

NEW Hanover® High-Tab® Pedestal and Flexible Leveling Shims

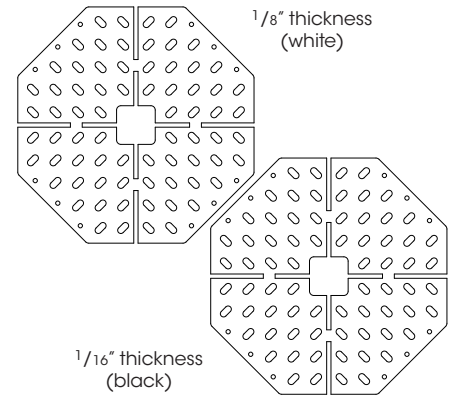

NEW Hanover® High-Tab® Pedestal
patent pending

7" across flats, 5/8" thick
1/8" spacers

NEW Flexible Rubber-like
Leveling Shims

NEW High-Tab® Pedestal

In an effort to provide performance, Hanover® is introducing the NEW High-Tab® Pedestal to the Hanover® Pedestal Systems line. The increased height spacer tab on the pedestal will greatly improve installations when leveling shims are needed. When one or more shims are used, pavers can shift from position or alignment. The added height of the High-Tab® will secure each paver in its proper location.

The High-Tab® Pedestal can also be stacked without losing the performance of the higher spacer tab. High-Tabs have been designed so they can be turned and engaged - one into the other - in such a way that the integrity of the added height is still available from the top pedestal.

- Increased spacer tab height
- Prevents paver misalignment
- Can be used with other Hanover® Pedestal Systems

NEW Flexible Rubber-like Leveling Shims

Final adjustments can be achieved with Hanover's NEW flexible Leveling Shims. These shims are rubber-like, preventing paver movement and providing a more solid feel. They will not slide as they eliminate "rigid on rigid" placement. Thicknesses are available in 1/8" (white) or 1/16" (black). Leveling Shims may be separated into halves or quarters for individual paver adjustments.

- Available in two thicknesses
- Color coded for easy identification
- Flexible, rubber-like material
- Eliminates paver movement
- Gives the installation a more solid feel
