

INTENSIFYING SEALER

for Paver and Sand Joints

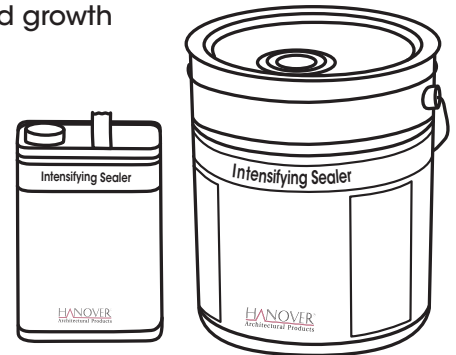

Product Information

A protecting sealant that allows breathability of the concrete masonry or paver unit

DESCRIPTION:

This sealer enhances the appearance of the architectural concrete masonry units. It is impervious to liquids, yet is vapor/air permeable. Intensifying Sealer provides excellent protection from water, alkalis, acids, air borne pollutants and ultraviolet light.

- deepens and sharpens color
- reinforces joints by keeping sand in place
- protects against oil and dirt penetration on paver surface
- minimizes erosion and weed growth
- makes surface easy to clean
- environmentally compliant

PERFORMANCE TESTING:

Intensifying Sealer was spray applied at 4 - 6 wet mils to masonry units, allowed to air dry, then subjected to the following agents/chemicals:

TEST / AGENT	DURATION	TEST RESULT
Hydrochloric Acid	3 hours	No effect. No damage to Intensifying Sealer.
Water	24 hours	No effect. No damage to Intensifying Sealer.
Hydrogen Peroxide	24 hours	No effect. No damage to Intensifying Sealer.
Motor Oil	24 hours	No effect. No damage to Intensifying Sealer.
Formula 409®	24 hours	No effect. No damage to Intensifying Sealer.

COVERAGE:

Rough Surface = 150 sq ft/gal @ 1.0 mil
Smooth Surface = 200 sq ft/gal @ 1.0 mil
Consumption will depend on surface porosity.

NET CONTENTS:

1 US Gallon (3.7853 L) or 5 US Gallon (18.9 L)
Weight/Gallon: 7.49 lb/gal

APPLICATION:

Intensifying Sealer is ready to use and requires no mixing or dilution. Surface must be clean, dry, free from oil, grease, dust, dirt, sand, efflorescence and frost. Intensifying Sealer is sprayable with an airless metal sprayer or can be applied with a brush or roller. Apply over clean, dry block. Exterior applications only. Sealer may increase slipperiness. For complete application instructions, refer to product label.

Before using this product, read the Material Safety Data Sheet for additional safety precautions.
