

STRINGALONG™

A product of Cappuccio Enterprises

U.S. Patent 6,421,926

Making adjustments is easy. Simply loosen the Thumb Screw and move the collar up or down the Steel Grade Stake - with or without the string attached.

No more wasted time struggling with knots!

STRINGALONG can handle many string lines at a time.

A. Gripping Teeth hold string lines securely.

B. The Lock Notch for beginning and end of string line runs to insure no slippage of string.

STRINGALONG

One handed adjustment of **STRINGALONG**

Set once with a laser or transit and you are done!

LASERSQUARE™ PRO

LAYOUT TOOLS

90° Vertical Dual Laser with Hard Case

Rugged, molded, padded, plastic case includes: 2 laser targets, 1 set laser-enhancing glasses, 1 cast aluminum LASERSQUARE PRO, 1 set C batteries. Place for extra set of C batteries.

Shipping Weight: 3 lb (1.5 kg)

When shooting longer lines for bond straightening, use supplied targets.

Initial layout, reference checking or setting.

Laser lines give the opportunity to snap permanent chalkline.

LASERLEVEL™

Transit, Tripod, Rod, and Target for Jobsite Layout

Quick setup...Simple to use...Speeds elevation checking

All on one Hard Case design...Nothing left behind

All components nest perfectly into hard case. There is even a spot for an extra D battery.

Grooved Rod allows for easily adjusted friction fit Target. Target uses 9 Volt battery. Shoot Laser from both front and back of target. Visual and audible indicators.

Operates on 1D battery.
Simple operation: Self leveling Laser is permanently attached to tripod. Laser head adjustment is easy with spring tensioner.

1. Set tripod feet into soil.
2. Adjust laser head, so that bubble level is near center.
3. Push "on" button.
4. Unit will self-level and show green light. You are good to go.

Aluminum 3 ft Rod sections snap and lock together.

Shipping Weight: 22 lb (10 kg)
